Degree/Certificate	Institute/University	CGPA/Percentage	Year
B.Tech. in Computer Science & Engineering	VIT Bhopal University	8.82	2024 – 2028

DATA ANALYTICS PROJECTS

Banking & Financial Analytics Dashboard

Power BI, SQL, Python, Pandas, DAX, Exploratory Data Analysis (EDA)

- Processed and structured **3000+ banking customer and transaction records** using Python and SQL, performing automated ETL, data cleaning, and data modeling for seamless BI integration.
- Executed detailed exploratory analysis on transaction volumes, credit risk profiles, and account balance distributions to identify key drivers behind customer churn and loan default trends.
- Built a dynamic, multi-page **Power BI dashboard** featuring advanced DAX measures, interactive drill-downs, and customer segmentation filters, reducing reporting turn-around time for stakeholders by **35%**.

Blinkit Sales & Retail Performance Dashboard

Power BI, Power Query, DAX, Excel, Descriptive Statistics

- Ingested and structured **1,000+ retail item transaction records**, executing data cleaning, custom column transformations, and data modeling in Power Query for fast-moving consumer goods (FMCG) analysis.
- Formulated complex **DAX measures** (Time Intelligence, Dynamic Rankings, KPIs) to evaluate total sales, average sales per transaction, customer ratings, and item inventory distribution across outlet tiers.
- Developed an interactive Power BI dashboard featuring dynamic slicers by outlet type, location, and item fat content, improving retail operations analysis and inventory decision efficiency by **30%**.

FULL-STACK PROJECTS

AdVantage-Gen – GenAI

React.js, Node.js, Express.js, MongoDB, Gemini API, Tailwind CSS

- Architected a full-stack AI platform integrating the **Gemini API** to automatically generate targeted marketing copy and visual poster concepts from prompt parameters.
- Built an intuitive, state-driven dashboard in **React.js** and **Tailwind CSS** featuring real-time visual previews and modular asset customization for quick poster layout tweaks.

Full-Stack E-Commerce Platform

React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Tailwind CSS

- Engineered a scalable full-stack e-commerce application featuring secure JWT authentication, dynamic product filtering, and a highly responsive UI built with **React.js** and **Tailwind CSS**.
- Implemented centralized global state management using **Redux Toolkit** to seamlessly synchronize complex cart operations and user sessions, decreasing UI rendering delays by **30%**.

TECHNICAL & ANALYTICAL SKILLS

- Data Analytics & Statistics:** Data Cleaning, Data Wrangling, EDA, Descriptive & Inferential Statistics, Hypothesis Testing, Data Storytelling.
- Analytics Tools & Libraries:** Python, NumPy, Pandas, Matplotlib, Seaborn, MySQL, Advanced Excel (Pivot Tables, Formulas), Power BI.
- Full-Stack Development:** HTML5, CSS3, JavaScript (ES6+), React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Java.
- Developer Tools & Workflow:** Git, GitHub, RESTful APIs, Postman, JSON Data Structures.
- Soft Skills:** Technical Translation, Cross-Functional Collaboration, Analytical Problem Solving.

ACHIEVEMENTS & COMPETITIVE PROGRAMMING

- Competitive Programming:** Actively solved **150+ algorithmic problems** on **LeetCode** focusing on Data Structures and Algorithms.
- Smart India Hackathon (SIH):** College Finalist for architecting scalable, enterprise-grade web applications evaluated under technical criteria.
- Academic Excellence:** Maintained an outstanding cumulative GPA of **8.82 / 10.0** in B.Tech CSE at VIT Bhopal University.

CERTIFICATIONS & POSITIONS OF RESPONSIBILITY

Data Visualisation: Empowering Business Insights

Forage / TATA

- Completed virtual practical simulation interpreting executive business needs, cleaning datasets, and preparing C-suite analytics visual dashboards.

Core Technical Member – GSOC Innovative Club, VIT Bhopal

2024 – 2025

- Organized and spearheaded technical workshops on Git, GitHub workflows, data wrangling, and web development fundamentals for **200+ students**.
- Mentored peer developers in software architecture, dynamic problem solving, and analytical data modeling.
